Toxic Substance Plan Information

Name and CAS numbers of toxic substance for this report	PM10 - Particulate <= 10 micron, CAS NA-M09 PM2.5 Particulate <= 2.5 micron, CAS NA-M10
Name and CAS numbers of other substances created or used at facility	None
Date of most recent plan	November 26, 2013
Objectives of plan, and targets	P&G has a long history of safe and responsible use of combustion fuels in Brockville, and has already invested significant resources to reduce emissions including PM10 and PM2.5. Through this plan, P&G is committed to reducing emissions of PM10 and PM2.5. This will be accomplished by assessing potential reductions through material or feedstock substitution, product design or reformulation, equipment or process modification, spill and leak prevention, on-site reuse or recycling, improved inventory management or purchasing techniques, and training or improved operating procedures.
Summarize any amendments to the plan	There are no plan amendments
Summarize the steps taken during the reporting period towards achieving the objectives of the plan	Option 1 health and safety study resulted in potential concerns, causing a follow-up step to be delayed and re-evaluated. Option 2 engineering study was completed as planned.
Summarize the effectiveness of the steps taken during the reporting period	Option 1 is being re-evaluated due to the results of the health and safety study. Therefore, the 2014 planned reductions were not realized. Option 2 is on track for additional steps in 2015 and reductions in 2016
Review implementation progress and timelines set out in the plan	Option 1 will be evaluated further in 2015 Option 2 is on track according to plan
Summarize actions taken in this reporting year that were additional to the steps described in the plan	There were no actions taken in the reporting year that were additional to the steps described in the plan.

Certification

As of June 1, 2015, I, Don Babbitt, certify that I have read the report on the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the information contained in the report is factually accurate and the report complies with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.

Particulates <= 10 Micron
Particulates <= 2.5 Micron
