Toxic Substance Plan Information

Name and CAS numbers of toxic substance for this report	PM10 - Particulate <= 10 micron, CAS NA-M09 PM2.5 Particulate <= 2.5 micron, CAS NA-M10
Name and CAS numbers of other substances created or used at facility	None
Date of most recent plan	November 26, 2013
Objectives of plan, and targets	P&G has a long history of safe and responsible use of combustion fuels in Brockville, and has already invested significant resources to reduce emissions including PM10 and PM2.5. Through this plan, P&G is committed to reducing emissions of PM10 and PM2.5. This will be accomplished by assessing potential reductions through material or feedstock substitution, product design or reformulation, equipment or process modification, spill and leak prevention, on-site reuse or recycling, improved inventory management or purchasing techniques, and training or improved operating procedures.
Summarize any amendments to the plan	There are no plan amendments
Summarize the steps taken during the reporting period towards achieving the objectives of the plan	No reduction options were implemented during the 2020 year.
Summarize the effectiveness of the steps taken during the reporting period	No reduction options were implemented during the 2020 year.
Review implementation progress and timelines set out in the plan	Option 1 was not implemented due to plant closure Option 2 was not implemented due to plant closure
Summarize actions taken in this reporting year that were additional to the steps described in the plan	Except for a reduction in production volumes caused by a gradual plant shut down, no reduction actions were taken in the reporting year that were additional to the steps described in the plan.
