

Company Focus

Prevention and Regulatory Solutions Ltd provides professional contract and consulting services in regulatory compliance and prevention for health, safety, and environmental matters. Their expertise, advice, and professional support typically begins with procedures, checklists, audits, reports, and training and ends with knowledgeable clients equipped and prepared to meet the challenges of customers, inspectors, and auditors.

Programs are designed and customized with end-users in mind so they stay fresh, easy to maintain, and valuable over time.

Value Added

Prevention and Regulatory Solutions Ltd. is dedicated to helping firms achieve compliance with legislation and beyond. Clients receive professional and cost-effective solutions that typically pay dividends through lower accident and severity rates, WSIB rebates, environmental improvements, lower property risk, healthier and happier workforces, impressed auditors, and satisfied regulatory inspectors.

Leadership

The founder of Prevention and Regulatory Solutions Ltd. is John McGeough, P.Eng. John graduated from Western University's chemical engineering program in 1985, and began working as a production supervisor at a diverse pharmaceutical manufacturing facility. After a short time, John moved into a newly-created health, safety and environmental engineering role to help comply with expanding legislation from Ontario's labour and environment ministries. This provided many opportunities to develop and implement health, safety, and environmental improvements and systems. It was through this work that John realized the enormous benefits available to people and businesses by applying preventive principles.

As John's career progressed, he took on various positions in engineering, maintenance, and plant management in pharmaceutical, food, consumer goods, and automotive industries. Throughout these positions he maintained an active role in regulatory compliance and prevention, because, as he quips, ***"once you are a safety guy, you're a safety guy for life!"***
